**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a canopy release mechanism, classified in class 244, subclass 151B.
  - II. Claims 9-11, drawn to a parachute canopy release mechanism, classified in class 244, subclass 151B.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as water activated release triggering unit. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Edgar Averill on 2/23/2003 a provisional election was made without traverse to prosecute the claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-11 are

Art Unit: 3644

withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Maziarz (4,864,083).

Re - Claims 1 and 2: Maziarz discloses a canopy release locking bar (38) held by the frame (#12) and movable cover (44), the locking bar locks the cover to the frame when it is in its closed position and permits the cover to move to an open position when the canopy release locking bar is in an open position which allows the cover to move and expose the actuating lever, wherein said canopy release locking bar is held by said cover (see Figure 4)

Re - Claims 4: Maziarz discloses a canopy release locking bar held at an outer end of said hinged cover, said canopy release locking back having a frame engaging member, said canopy release locking bar being moveable to an unlocked position.

***Allowable Subject Matter***

7. Claims 3 and 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
